Planning data analysis

MODULE 1: INTRODUCTION TO DAIRY DELIGHTS

WHO WE ARE

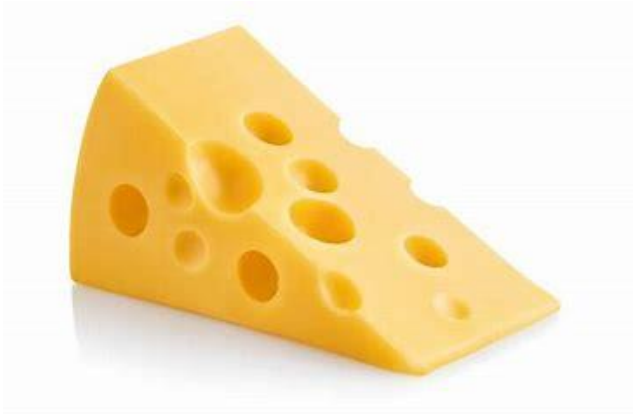
We are a Data Consultancy company asked by Dairy Delights to assist with their data project.

DAIRY DELIGHTS

Review the first document and make notes of:

- **The products**
- **Company ethics**
  - Sustainability
  - Community engagement
- **Sales profile**
  - Direct to public sales (company store – 10%)
  - Retail presence (through resellers – 85-87%)
  - Online presence (small limited to a few customers – 2-5%)

CURRENT PRODUCTS



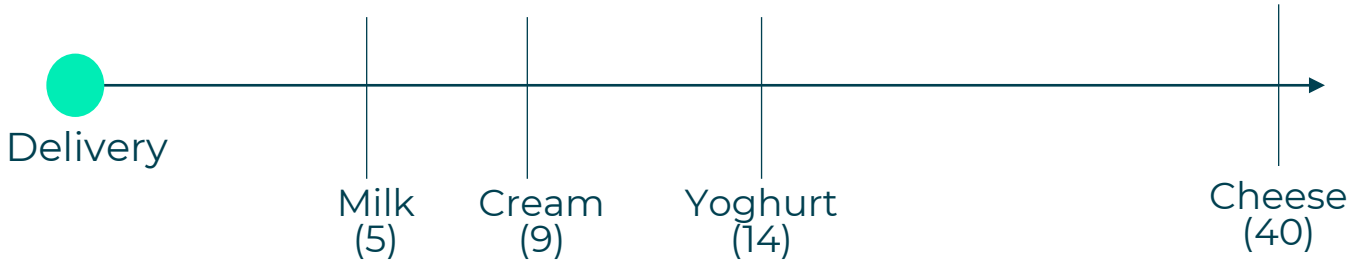
DIVERSITY

We have researched two groups of products but cannot decide which one to produce.

- Cultured products
  - E.g., Skyr, Kefir, Labneh, Clotted cream, Cottage cheese, Labneh balls, Buttermilk, Sour cream, crème fraiche, Aryan, Viili, Filmjolk, Armasi
- Specialty products
  - E.g., Burrata, Ghee, Mascarpone, Halloumi, Quark, Manchego, A2 milk products

DATA ISSUES

- Limited self-life (depends on product)



- Limited feedback from resellers
- High wastage
- Customer issues

MODULE 2: BRAINSTORMING

DAIRY DELIGHTS

SYSTEMS AND ISSUES

→ **Inventory management system**
- Only within Dairy Delights itself
- No data from resellers

→ **Reseller communications channel**
- Ordering systems slow, manual paper input

→ **Supply chain constraints**
- No contracted delivery company
- Postal service for small orders

→ **Quality control processes**
- Only within Dairy Delights itself
- No data from resellers

→ **Packaging and storage**
- Environmental packaging only
- Damage to products complaints

→ **Lack of customer support**
- Little continuous feedback from clients

EXERCISE 1

- Brainstorming business problems
- Problem presentation
- Defining the scope
- Scope presentation

MODULE 3:
STAKEHOLDERS
DAIRY DELIGHTS

STAKEHOLDERS

We have access to the stakeholders within the business, including:

- Senior management
- Production and warehousing staff
- IT staff
- Pre-selected clients who the company works with as advisors

EXERCISE 2

- Identifying stakeholders
- Stakeholder interviews (role playing)
- Reporting findings
- Defining data analysis scope

MODULE 3: RESEARCH AND BUSINESS QUESTIONS

DAIRY DELIGHTS

BUSINESS PROBLEMS

- Improved inventory management
- Feedback mechanism
- Sustainability initiatives
- Quality assurance and customer support
- Product diversification

CURRENT SYSTEMS

Inventory management:

- The company has a good grasp of what it produces and what is in stock at the warehouse.
- Stock is delivered to resellers as soon as possible.

Reseller feedback:

- Limited visibility of stock at reseller or feedback on products selling out.

Quality:

- Limited feedback on cause of quality issue apart from packaging.
- The need for more information to be held has been identified.

Product diversification:

- No data is held but thinking about surveys and questionnaires.

THINK ABOUT THE DATA

Product diversification

- What data do we require to make responsible decisions on new products?
- Product research
- Market expectations
- Specialty and cultured products needs and market availability
- Customer feedback security

CURRENT SYSTEMS - INVENTORY

- Link to the reseller orders and direct sales systems
- Holds the quantity in stock of each product in the warehouse and the related production / sell-by dates
- Marked as internal stock currently as opposed to stock at a reseller
- Delivery to reseller can be made within 2 hours for items in stock

RESEARCH DATA

Currently **no** research data is held.

Needs to hold enough data to see market trend and possible customer base and requirements.

SYSTEMS

- Inventory system
  - To be expanded to include reseller data
  - Reseller limiting data transfer
  - Stock at resellers and sales

- Research and customer feedback system
  - Customer surveys (face to face and telephone)
  - Customer letters and questionnaires
  - Customer phone enquiries

EXERCISE 3

- Recap research and business questions
- Identify data sources
- Prioritisation
- Priority presentation
- Finalise data collection plan

MODULE 4: DATA SECURITY

DAIRY DELIGHTS

DATA SECURITY

What mechanisms should be put in place?

Are there any legislation involved?

EXERCISE 4

- Introduction to data security
- Data security assessment
- Group discussion and enhancement
- Comprehensive data security

MODULE 5:
PERSONAL DATA
DAIRY DELIGHTS

PERSONAL DATA SECURITY

What personal details will / should be held?

How can the details be secured?

Internal personal details

- Gathered by Dairy Delights
- Gathered by resellers

External details

- Reseller data

EXERCISE 5

- Personal data and privacy by design
- Data mapping and identification of personal data
- Personal data assessment
- Privacy by design implementation
- Group presentation
- Interactive discussion

MODULE 6: MULTI-FUNCTIONAL TEAMS

DAIRY DELIGHTS

MULTI-FUNCTIONAL TEAMS

Who should be in the data analysis team?

What skills should the team members bring to the table?

EXERCISE 6

- Multi-functional teams
- Identify key roles
- Define responsibility
- Reflect on the importance of collaboration
